

INTRO TO DATA SCIENCE

LECTURE 1: DATA EXPLORATION

INTRO TO DATA SCIENCE

WELCOME!

Course Website: <https://www.schoology.com/>

Producer: Emma Walker

Instructors: Peter Passaro, Doug McIlwrath

E-mail: peter@datai.st, douglas.mcilwrath@cantab.net

Teaching Assistants: Calvin Giles, Tom Halloran

Course Times: 10:00am-1:00pm, 1:30pm-4:30pm, Saturdays (Back Hill)

- **Basic Statistics (Mean, Variance, Samples, etc.)**
- **Maths**
 - **Algebra (Polynomials, Graphing, etc.)**
 - **Linear Algebra (Vectors, Matrices, etc.)**
 - **Some Calculus**
- **Exposure to Programming**

I. WHAT IS DATA SCIENCE?

II. THE DATA MINING WORKFLOW

LAB:

III. WORKING AT THE UNIX COMMAND LINE

IV. VISUALIZING DATA WITH R & GGPLOT2

I. WHAT IS DATA SCIENCE?

- A set of tools and techniques used to extract useful information from data.

- A set of tools and techniques used to extract useful information from data.
- An interdisciplinary, problem-oriented subject.

ONE MORE THING!

Communication skills

- A set of tools and techniques used to extract useful information from data.
- An interdisciplinary, problem-solving oriented subject.
- The application of scientific techniques to practical problems.

- A set of tools and techniques used to extract useful information from data.
- An interdisciplinary, problem-solving oriented subject.
- The application of scientific techniques to practical problems.
- A rapidly growing field.

Michael E. Driscoll

@medriscoll

Following

Data scientists: better statisticians than
most programmers & better programmers
than most statisticians bit.ly/NHmRqu

More

Pocket

(Valve Software)

- Statistical and machine learning knowledge
- Engineering experience
- Academic curiosity
- Product sense
- Storytelling
- Cleverness

The state of our union is ... dumber:

How the linguistic standard of the presidential address has declined

Using the [Flesch-Kincaid readability test](#) the Guardian has tracked the reading level of every state of the union

Music + Data:
<http://bit.ly/echonest>

- Stack Overflow tag recommendation and response time prediction
- Locating ethnic food in ethnic neighborhoods
- Building optimal NBA teams
- Recommending new musical artists
- Prioritize emergency calls in Seattle
- Finding the right college for you

II. THE DATA SCIENCE WORKFLOW

Dataists

- 1. Obtain
- 2. Scrub
- 3. Explore
- 4. Model
- 5. Interpret

Jeff Hammerbacher

- 1. Identify problem
- 2. Instrument data sources
- 3. Collect data
- 4. Prepare data (integrate, transform, clean, impute, filter, aggregate)
- 5. Build model
- 6. Evaluate model
- 7. Communicate results

Ted Johnson

- 1. Assemble an accurate and relevant data set
- 2. Choose the appropriate algorithm

Ben Fry

- 1. Acquire
- 2. Parse
- 3. Filter
- 4. Mine
- 5. Represent
- 6. Refine
- 7. Interact

NOTE

This diagram illustrates the *iterative* nature of problem solving

III. WORKING AT THE UNIX COMMAND LINE

Download this dataset:

<http://bit.ly/pacedataset>

KEY OBJECTIVES

- Navigate the filesystem
- Create, move, copy, and delete files & directories
- View & search files
- Edit & interact with files
- Combine steps
- Learn more

TOOLS

- ls, cd
- cat, touch, mv, cp, mkdir, rm, rmdir
- head, tail, less, cat, grep
- vim, tr, sort, uniq, wc
- pipe (|)
- man, apropos

NOTE

Being comfortable at the command line makes your life much easier!

IV. VISUALIZING DATA WITH R AND GGPLOT2

KEY OBJECTIVES

- Become familiar with the R environment
- Explore data in R
- Visualize data using ggplot2
- Mathematical bonus: power laws

IV. VISUALIZATIONS AS A MEDIUM FOR UNDERSTANDING

Consider the following dataset:

- eleven (x, y) points

Consider the following dataset:

- eleven (x, y) points
- mean of $x = 9$, mean of $y = 7.5$

Consider the following dataset:

- eleven (x, y) points
- mean of $x = 9$, mean of $y = 7.5$
- variance of $x = 11$, variance of $y = 4.1$

Consider the following dataset:

- eleven (x, y) points
- mean of $x = 9$, mean of $y = 7.5$
- variance of $x = 11$, variance of $y = 4.1$
- correlation of x and $y = 0.8$

Consider the following dataset:

- eleven (x, y) points
- mean of x = 9, mean of y = 7.5
- variance of x = 11, variance of y = 4.1
- correlation of x, y = 0.8
- line of best fit: $y = 3.00 + 0.500x$

EXERCISE – WHY VISUALIZE DATA?

38

Now, suppose I give you
three more datasets
with exactly the
same
characteristics...

Q: how similar are
these datasets?

EXERCISE – WHY VISUALIZE DATA?

39

Now, suppose I give you three more datasets with exactly the same characteristics.

Q: how similar are these datasets?

A: not very!

INTRO TO DATA SCIENCE
